

AI Job Market Analytics Dashboard (Excel)

Project Overview

The **AI Job Market Analytics Dashboard** is an interactive Excel dashboard developed to analyze hiring trends in the Artificial Intelligence industry. It provides insights into job demand, salary distribution, hiring companies, employment types, experience levels, and monthly recruitment trends.

Objectives

- Analyze AI job market trends.
 - Identify top hiring companies.
 - Compare AI job salaries.
 - Analyze experience-level demand.
 - Understand employment type distribution.
 - Track monthly AI hiring trends.
-

Dashboard Features

Key Performance Indicators (KPIs)

- **Total Jobs:** 200
- **Average Salary:** ₹15 Lakhs
- **Average Company Rating:** 4.05

Interactive Filters (Slicers)

Users can filter data by:

- Job Title
 - Company
 - Experience Level
-

Visualizations Included

1. Job Share by Employment Type

Displays AI jobs across:

- Full-Time
- Part-Time
- Contract
- Internship
- Remote

2. Company vs Experience

Shows hiring demand by company and experience level.

3. Top Hiring Sectors

Compares hiring demand across AI job roles.

4. Average Salary by Role

Displays average salary for different AI roles.

5. Monthly AI Job Postings

Tracks monthly recruitment trends.

Tools & Technologies Used

- Microsoft Excel
 - Pivot Tables
 - Pivot Charts
 - Slicers
 - Conditional Formatting
 - Data Cleaning
 - Dashboard Design Techniques
-

Dataset Information

The dataset contains AI job information including:

- Job ID
 - Job Title
 - Company
 - Salary
 - Employment Type
 - Experience Level
 - Industry
 - Company Rating
 - Location
 - Date Posted
 - Skills
-

Key Insights

- Full-Time positions dominate AI hiring.
 - AI Engineers receive the highest salaries.
 - Technology companies lead AI recruitment.
 - Mid-Level professionals are in highest demand.
 - Hiring trends vary across months.
-

How to Use

1. Download the Excel dashboard.
 2. Open using Microsoft Excel (2016 or later).
 3. Filter using Job Title, Company, and Experience Level slicers.
 4. Analyze KPIs and charts.
-

Future Enhancements

- Power BI Dashboard
- Live Job API Integration
- Salary Prediction
- Skill Gap Analysis

- Geographic Job Maps
