

Tourism Analytics Dashboard (Excel)

Project Overview

The **Tourism Analytics Dashboard** is an interactive Excel-based analytics solution developed to analyze tourism trends, destination performance, travel budgets, tourist ratings, and visitor distribution. It enables tourism organizations and travel agencies to make informed decisions using interactive dashboards.

Objectives

- Analyze tourist destinations.
 - Compare destination budgets.
 - Identify popular travel locations.
 - Analyze tourist ratings.
 - Study tourism spending patterns.
 - Support tourism planning.
-

Dashboard Features

Key Performance Indicators (KPIs)

- **Total Tourists**
- **Total Budget**
- **Average Rating**
- **Average Trip Duration**

Interactive Filters (Slicers)

Users can dynamically filter dashboard data by:

- Origin Country
 - Destination Spot
 - Gender
-

Visualizations Included

1. Destination Spot vs Budget Allowed

Compares budget allocation for each destination.

2. Budget by Origin Country

Displays tourism budget contribution by country.

3. Budget by Destination

Ranks destinations by total travel budget.

4. Destination Spot vs Tourist Count

Shows tourist visits across destinations.

5. Average Rating by Destination

Compares customer ratings for each destination.

6. Duration Span by Budget Allotted

Analyzes the relationship between trip duration and travel budget.

Tools & Technologies Used

- Microsoft Excel
 - Pivot Tables
 - Pivot Charts
 - Slicers
 - Conditional Formatting
 - Data Cleaning
 - Dashboard Design Techniques
-

Dataset Information

The dataset contains tourism-related information including:

- Tourist ID
 - Tourist Name
 - Gender
 - Age
 - Origin Country
 - Destination Spot
 - Budget Allowed
 - Duration Span
 - Rating
 - Travel Date
-

Key Insights

- Premium destinations receive higher travel budgets.
 - Popular destinations attract the highest tourist count.
 - Highly rated destinations encourage repeat visits.
 - Budget allocation differs by country.
 - Longer trips generally require larger budgets.
-

How to Use

1. Download the Excel dashboard.
 2. Open using Microsoft Excel (2016 or later).
 3. Use slicers to filter by Origin Country, Destination Spot, and Gender.
 4. Explore interactive charts for tourism insights.
-

Future Enhancements

- Power BI Dashboard
 - Tourism Forecasting
 - Weather Impact Analysis
 - Hotel Occupancy Dashboard
 - Machine Learning Prediction
 - Live Tourism Data Integration
